WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut 350 x 300 mm with a 90 x 90 mm tab centred above and below:
480 mm tall overall. Round the outside corners to about 5 mm.
Heights from the bottom edge of the lower tab; sideways from the
centre line. The plate-holes picture repeats every position.
Saddle bolts: four 9 mm holes on the centre line, 10 and 50 mm up,
and 430 and 470 mm up (one pair in each tab).
Lug screws: four 5.5 mm holes 142 mm each side, 100 and 380 mm up.
Shield screws: drill 4.2 mm and tap M5, 164.5 mm each side,
140 and 340 mm up.
Fit: the back face bolts flat on two saddles with four M8 bolts from
the front; the enclosure hangs on its front by the four lugs.
Check: lay a saddle on each tab and look through the holes.
